

# AIISA, NADCA Communication Efforts After the Pandemic

**T**he COVID-19 pandemic has attracted great attention to indoor air quality (IAQ) and duct cleaning activities.

This has led to a significant increase in companies that have turned to this business.

Naturally, the number of AIISA members has also increased considerably.

The focus on IAQ topics has also brought to light widespread misinformation on the topic. This leads to a potential problem on the correct approach to solving problems related to IAQ and the professional execution of Duct Cleaning operations in accordance with AIISA NADCA Protocols.

For this reason, the Board of Directors of AIISA has decided to create the role of the Technical Manager of AIISA who has to manage all the technical information dealing with air duct systems.

## TRAININGS ACROSS 2022

**March 2022, Florence: National Healthcare Inspectors**  
70 attendees (webinar)

**April 2022, Roma Region: Graduated HVAC Engineers**  
200 attendees (webinar)

**May 2022, Padua (north Italy): National Healthcare Inspectors**  
80 attendees (locally organized)

**July 2022: Checklist and content writing for the National Guideline on health emergency in rest homes**

**September 2022, Roma National Council of Graduated Engineers**  
950 attendees (webinar)

**October 2022, Napoli: Graduated HVAC Engineers**  
200 attendees (webinar)

**October 2022, Firenze: Safety Graduated Surveyors**  
25 attendees (locally organized)

**Gregorio Mangano, ASCS, CVI  
AIISA President**

**Giacomo Saliniti, ASCS, CVI**

The person in charge is Giacomo Saliniti, ASCS, CVI. In the last year AIISA has been very focused on promoting cultural collaborations with several institutions committed in IAQ management, in order to improve the brand awareness of AIISA and NADCA in Italy.

Some very interesting training experiences have materialized, generated by the notoriety of the Associations, by the cultural stimulus exercised by AIISA and NADCA and, in a couple of times, thanks to the Members' drive.

In addition, AIISA participated in various National technical working panels on IAQ.

In conclusion, AIISA seized the opportunity of COVID-19 to implement the efforts of promoting duct cleaning business in accordance with the NADCA and AIISA standards. ●
